Instructions: there are 4 tabs at the bottom, that describe current 4 interlinked loot tables for The long dark INTERLOPER ONLY.  
 To recognize which table are You on, you must find couple of rare items.(e.g. if you found magnifying lens on mountaneering hut TWM,  
 You might be pretty sure that it is RLT1 table (RareLootTable) since it doesn't appear on any other table.)

Then check on which table it appears .

Then You will know exactly where are other items on this run. Have fun!

Special thanks to Aththeon (<https://www.twitch.tv/atheenon>)!

Some items like Firestriker or MagLens might spawn at very low condition and disappear before You reach them!
